

VCL FOR PHP (CONTINUED)

jQuery component JQuerySlider	x
PEAR component PearDataGrid	x
New! Zend Framework components ZACL, ZAuth, ZAuthDB and ZAuthDigest	x
Extend the VCL for PHP at any time with third-party libraries, new additions to the VCL for PHP open source project on SourceForge or your own components	x
Component Writer's Guide with information on building your own components	x

CODE EDITOR

Customizable source code editor for PHP and HTML editing	x
User configurable Color Syntax Highlighting	x
Enhanced! CodeInsight displays a list of symbols that are valid at the cursor location as you type or when you press Ctrl+Space	x
New! ErrorInsight provides syntax checking as you type, so you can easily fix syntax errors on the fly	x
New! Code Folding to collapse code blocks for easier viewing and navigation of your PHP code	x
New! Sync Edit to modify common identifiers in different locations in your code at the same time	x
New! Tracking band visually indicates which lines you have modified/added and which ones were modified on the last save operation	x
Enhanced! Macro recording and playback to record a specific set of actions in the code editor and repeat them later	x
New! Source formatter to consistently format source code	x
Each file in the code editor can have a specific encoding, a format and a character set	x
Bookmarks allow you to set a mark on a specific location of your source code and return back later	x
Code Editor customization options include overwrite mode, group undo, scroll to past line, double click line, undo after save, persistent blocks and overwrite blocks, selecting keymappings and setting undo limit	x
Configurable Source Options include auto indent mode, use tab character, smart tab cursor through tab, optimal fill, backspace unindents, keep trailing blanks, show tab character, show space character, use syntax highlight, show line breaks, highlight current line, selectable syntax highlighting, block indent level and tab stops	x
Editor display options include visible right margin, visible gutter, show line numbers number all lines, setting right margin, gutter width, editor font, font size	x
Keymappings include default, BRIEF, IDE classic, Visual Basic emulation, Visual Studio emulation	x
CodeInsight options turn on and off code completion, code parameters, error insight, code completion auto parenthesis, code template completion and code browser and enable speed adjustments	x
Code Templates include 15 pre-built timesaving templates that can easily be inserted into your code	x
Conversions menu item enables you to select a block of text and convert to all upper-case or all lower-case	x
Go to Line Number jumps to a line number in the code editor	x
Syntax Check performs a lint syntax check on the active file, showing results of the syntax checking operation in the messages window	x

INTEGRATED PHP DEBUGGING AND PROFILING

New! Integrated PHP Profiler to measure runtime performance and help identify bottlenecks down to the line of code	
Integrated PHP debugger helps find and fix errors	x
Breakpoint List window to display, enable, or disable breakpoints currently set in the loaded project, and to change the condition, pass count, or group associated with a breakpoint	x
Call Stack window shows a list with the functions called when debugging or when the execution in debug mode is finished	x
Global Variables window shows the current function's global variables while in debug mode	x
Watch Properties dialog enables you to enter a watch expression	x
Watches window displays the current value of the watch expression based on the scope of the execution point	x
Select Debug Desktop dialog box to determine which saved desktop layout is used when you are debugging	x

DATABASE APPLICATION DEVELOPMENT

Enhanced! Data Explorer to add a new connection, modify, delete, or rename your database connections	x
New! Support for Microsoft SQL Server, Oracle, PostgreSQL, Informix, Sybase DB2, and SQL Anywhere in the Data Explorer in addition to support for MySQL and InterBase	x
Connectivity to all other PHP supported databases via ADOdb	x
New! Drag and drop from the data explorer to build data-driven applications with no coding	x
New! Data Viewer Data tab shows a DBGrid browsing the dataset selected in the Data Explorer	x
New! Data Viewer SQL tab to execute a SQL query against the dataset selected in the Data Explorer and display the results	x
VCL for PHP data access components	x

DATABASE APPLICATION DEVELOPMENT (CONTINUED)

VCL for PHP data controls components	x
VCL for PHP native components for InterBase	x
VCL for PHP native components for MySQL	x
New! VCL for PHP native components for Oracle	x
VCL for PHP PEAR DataGrid component	x

DOCUMENTATION

Context sensitive online help for the development environment available via F1 in the IDE	x
New! Documentation wiki accessible via the online help for the latest doc updates	x
Enhanced! VCL for PHP class library documentation and code examples	x
Enhanced! Sample programs with documentation	x
PHP Reference Guide	x
New! Install PHP Reference Guide in your choice of English, German, Japanese, Spanish, Portuguese, Traditional Chinese	x
